

Les Meyer
Executive Biography

Les Meyer provides over twenty-seven years of experience in construction administration and cost analysis in varying capacities. Throughout his career he has managed a team of personnel as well as payroll, accounts payable, reporting, and internal controls, creating new accounts and payroll procedures while overseeing the development and implementation of the corporate cost coding structure.

Beginning his career as a project administrator he progressed in his abilities and skills through key responsibilities reconciling of all labour, equipment, and material charges in daily LEM presentations to clients and preparing project cost reports. Les collaborates with procurement teams to ensure applicable cost allocation and maintaining communication with change management and documentation personnel to ensure the correct coding. He progressed into positions as a cost analyst and cost controller, his professional scope increased as he successfully oversaw cost control, reporting, forecasting, budget reconciliation and payment approval for several contracts worth a total of \$125 million. He has developed and implemented processes and procedures for site administration staff, including site specific internal reporting structure, guidelines and expectations.

Renowned for his impressive work ethic and high attention to detail, he describes himself as 'process driven' and enjoys contributing to successful project completion with timely and accurate cost information. Les excels at mentoring less experienced colleagues in all areas of administration and cost control, seeing the latter as intrinsically connected to business success.

Les holds a Business Administration Diploma, in Accounting from Lethbridge College. Les also recently obtained his Applied Project Management Certificate from Medicine Hat College. He is married to his wife, Kathy for more than twenty-nine years and proudly speaks of his two 'amazing sons, Ryan 29 and Eric 27.
